

FILBUR MANUFACTURING RESIDENTIAL / COMMERCIAL POOL & SPA FILTER CARTRIDGES AND GRIDS

First with OEMs.

Dedicated to distributors and dealers.

Founded on value.

CONTINUOUS COLLABORATION.

We began collaborating with customers in 1996 when we introduced our first line of custom spa cartridges, and we haven't stopped since. In the ensuing years, we've learned what it takes to earn, and keep, your business.

Quality cartridges. Quality relationships too.

More than 15 years producing pleated water filtration cartridges and D.E. grids has taught us a thing or two about clarifying what's most important. It's why our experts have designed our cartridges with stronger, reinforced extruded PVC cores for maximum flow and minimum energy draw. And why we've worked hand-in-hand with manufacturers and distributors since the beginning to deliver the choices, options, and value they need to succeed in today's competitive world.

Flexibility is how we put the "custom" in customer.

Not to mention the "value" in valued. As the leading manufacturer of OEM filters, our experts will bend over backwards to develop the custom applications pool and spa manufacturers need to set themselves apart. Bringing value-added thinking and a collaborative, 'can-do' attitude to every new idea. But we don't stop there. Our rapid prototyping and advanced manufacturing capabilities mean we can produce those design innovations with the short lead times OEMs are looking for.

CONTINUOUS IMPROVEMENT.

What we put into the business you get out.

We want to be the best at FILBUR. Which is why we're investing in tomorrow today. We've invested in product improvements and new personnel in key areas for one-on-one responsiveness.

We've also stepped up our marketing efforts. Our website will continue to evolve and provide you with information on promotions, new products, services, and other tools to help you grow your business. Plus our focus on innovation, quality, and collaboration is ongoing. From workforce and workflow to bottom line performance, we're building a culture of commitment at FILBUR. One that will benefit you in the days, months, and years to come.

We deliver a lot more than cartridges.

Peace of mind, for instance. More than 1,400 pool and spa filters and grids mean distributors and dealers can get what they need in a hurry. If it's unique you're looking for, our customized solutions, created in collaboration with our experts, are always an option. Plus cartridges with genuine high-performance spun bound polyester, and stronger, reinforced extruded PVC cores provide the reliability and longer life that translate directly into bottom line advantages for your business.

The right fit, right model, for every pool and spa brand.

FILBUR Cartridges

More than 1,200 FILBUR configurations are produced to OEM specifications under the strictest quality standards. Advanced formulation end caps resist deterioration from salt pools and high levels of chlorine.

FILBUR Freedom™ Antimicrobial Cartridges

Our premium antimicrobial cartridges prevent the growth of bacteria on the cartridge, reducing odors, algae, and mold. Plus FILBUR Freedom cartridges are easier to clean.

Heavy-Duty D.E. Grids

With our proprietary cloth, heavy-duty stitching, and reinforced skeletons, our genuine replacement grids are number one in quality and construction. When compared by a leading distributor, FILBUR grids had better dirt-holding capability and lower pressure drop than competitor grids.

About FILBUR Manufacturing

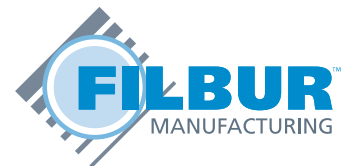

Located in Buena Park, California, FILBUR Manufacturing has been producing pool and spa cartridges and grids for over 15 years. With over 1,400 cartridge and grid configurations today, the company has grown to become the leading supplier of cartridges to pool and spa manufacturers (OEMs) in the United States. Flexible manufacturing and in-house new product development have allowed FILBUR to accommodate custom applications and short lead times.

FILBUR is committed to strengthening its leadership position in the design, manufacture, and marketing of pool and spa cartridges and grids.

The company is driven by the strong core values of honesty and integrity, as well as the desire to provide the highest quality and value to the OEM and wholesale distribution markets.

FILBUR is a subsidiary of Kemflo International. Kemflo's two facilities in Pingtung, Taiwan (460,000 sq. ft.) and Nanjing, China (980,000 sq. ft.) give FILBUR additional resources for growth, adding greater manufacturing and design capacity.

Kemflo International also owns the quality companies of Yakima and Hubco, both involved in the outdoor leisure industry.
